Please find below and/or attached an Office communication concerning this application or proceeding.

Commissioner for Patents

The drawing filed on 12/14/05 has been approved.

EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

1. This communication is an Examiner's reasons for allowance in response to application filed on 12/14/05, assigned serial 10/560779 and title "Vehicle stability control device".

2. The following is the Examiner's statement of reasons for the indication of allowable subject matter:

After carefully reviewing the application in light of the amended claims and the additional search of all the possible areas relevant to the present application, a set of related prior art references has been found, but those prior art references are not deemed strong to make the application unpatentable. Thus, it is found that the application is now in condition for allowance.

As per claim 1, the prior art of record does not disclose a device for controlling a behavior of a vehicle having a vehicle body, wheels and a steering apparatus that can steer the wheels independently of a driver's steering operation, the device comprising: a portion for calculating a target turning state control steering angle for the wheels for reducing a magnitude of a deviation of an actual turning state parameter from a target value for the turning state parameter when the magnitude of the deviation is at or above a reference value; and a portion for controlling a steering angle of the wheels based upon a final target steering angle incorporating therein a driver's steering operation, a predetermined steering characteristic and the reduction of the magnitude of the deviation of the actual turning state parameter from the target value for the turning state parameter when the magnitude of the deviation is at or above the reference value, and

Art Unit: 3664

wherein the target turning state parameter calculating portion calculates the target value for the turning state parameter by using the provisional target steering angle as a parameter representing a steered angle of the wheels. This limitation in combination with the other elements in the claim was not shown or suggested by the prior art.

Claims 1-11, are allowable over the prior art of record.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dalena Tran whose telephone number is 571-272-6968. The examiner can normally be reached on M-W (in a first week of a bi-week), and T-R (in a second week of bi-week) from 7:00AM-6:00PM.
